	on 1758 map are on site of medieval village. Excavations here in 2013 revealed features of medieval				
date including intercutting ditches and a wall base, and post-medieval pits.					

Site observation	By: MH	Date: 9/7/15		
Earliest date (visible structures):				
Phasing- extensions and contractions: Early stonewo	rk in north wall at junction	with corridor		
leading to church centre- infilling a doorway or possib	ly an entrance to a vault.			
Heating ducts: Centre of nave and walkways of north of nave. Grills in front of sanctuary.				
Internal graves/vaults: 16 th cent vault and another gr				
in north aisle. Late medieval and 16 th /17 th cent effigie	-	el (Erdington		
Chapel). Memorial slabs on walls of south aisle and no				
Floor levels raised or lowered: South-east chapel and chancel floors c40cm above nave and aisle				
floors.				
External drains: Around whole of exterior. Brick-lined gully along south wall and grills in path around				
	church.			
Churchyard: Two phases of churchyard extension to r	orth. The former boundary	of the lower area		
may be the original edge of the River Tame.				
Surroundings: Site of Westbrook House is very overgr				
Overall Assessment	Ву: МН	Date: 25/10/15		
Possibly better survival of below-ground deposits in c	hancel and south-east chap	el where floors are		
markedly higher than elsewhere in the church. Possib				
nave. Some of medieval wall fabric may survive unde	r 19 th cent refacing. Former	course of River		
Tame within churchyard may include palaeoenvironm	•			
survival of archaeological remains in western part of o	churchyard predating its 18 ¹	^h cent extension.		
Possible below ground remains of Westbrook House.				
Research Questions				
The church's origins: are there any remains of the pre-Conquest minster church?				
The church's development: little seems to be known of the development of the church up to the				
19 th cent restoration, and particularly its medieval development.				
What is the relationship of the church to the medieva	I village and the nearby mo	ated site?

therefore poor. However, the rectangular platform visible to the south extends into the churchyard					
and archaeological remains of former structures may survive on it. The steps recorded at the south-					

east of the church in 1895 may have led to a former structure here.

Research Questions

What is the relationship of the church to the platform? Is another structure to the south-east indicated by the steps found here?

Phasing- extensions and contractions: Tower 15 ^t	^h cent and nave probal	bly lengthened then, porch,
south and north aisles and south and north chape		
a few years earlier)with 18 th cent rebuilding. Part		
north aisle and vestries 1874-79. South porch reta	ains some portions of a	an oaken porch of 16 th or 17 ^t
cent date.		
Floor levels raised or lowered: Observations in 20	003 under two front ro	ws of pews showed that
archaeological deposits potentially survived unde	r pew platforms. Test	pits dug in nave, outer north
aisle and south aisle in 2015. A wall footing found	in the nave pit was of	f the line of the present
south arcade and may be the 13th cent nave sout	h wall. A grave was for	und to its north. In the outer
north aisle a possible former graveyard soil was o	verlain by a stone wall	at an angle to the present
church. Sand and gravel covering the wall, probat	oly a levelling layer laid	l during 19 th cent
construction, contained a fragment of decorated	medieval floor tile. In t	the south aisle a surface of
roughly shaped sandstone blocks was possibly an	external surface prior	to construction of the aisle
in the 16 th cent. It was overlain by a make-up leve	with a mortar surface	a la avia da vidada la vida a dala ana

Grills in sou Internal graves/vaults: Grave slabs in floor of nor floor of south aisle. Vault at south-west corner. Floor levels raised or lowered: Chancel raised ab pier base- vault here. Steps down from south door	cated churchyard bour ate. Some medieval por eshill Street. Archaeolo ven and stone footing ealed structures. Medi valaeolithic axe from Ro By: MH Th-south from south d th aisle. th aisle (but not outer ove Vesey Chapel. Sour r into church. South-ea pier base at east end o	ndary of 1832 and revealed ottery in later grave fills. ogical features and deposits of medieval timber building, eval to post medieval ectory Road. Date: 23/6/15 door. Grill at east end of nave north aisle). Grave slabs in th west corner raised above ast pier of nave- possibly

Churchyard: Substantial build-up on north side of church- vaults? Church built on a slope- would				
account for steps down from tower				
Surroundings:				
Overall Assessment	By: MH	Date:		
Probably good survival of below-floor deposits, judging from wall footings, floors and graves found in 2015 test pits. Wall in outer north aisle suggests possible features in surrounding graveyard.				
Research Questions				
What date is the first church on the site?				
What was the plan of the 13 th century church?				
What survives of structures dating from before the 16 th century building activity?				
What are the structures, originally outside the church, which were found under the outer north				
aisle?

Earliest date- documentary: Priest in Domesday I	Book- but possibly not at	t a church on this site		
Earliest date- structural: 13 th cent nave, north ais	le and north arcade. Circ	cular pier of first bay of		
north arcade is probably a survivor of the 13 th cer	nt arcade.			
Phasing- extensions and contractions: Chancel and				
arcade remodelled 15 th cent. 15 th cent window at				
Buttresses 19 th cent restoration. Cossins says mos	st of north wall of north	aisle is 18 th cent except for		
frags around north door, and north-east corner.				
Floor levels raised or lowered: Other works:				
Site moved: No				
Churchyard: Chamfered plinths of east and north walls are buried below ground level. Observation				
of trenches in 2008 showed that the apparent mo		-		
construction. To the east of the church it overlies a former ground surface with indications of				
possible ridge and furrow or former grave cuts. The mound material to the southwest of the church				
contained roof and floor tile fragments, a lens of lime mortar, worked masonry, and pottery of 13 th				
to 17 th century date. An unsurfaced hollowed pat				
later path surfaces. Very little human bone was fo		locks found on east wall of		
south aisle and painted plaster fragments in wall core.				
Surroundings: Ridge and furrow in field to south. Field patterns on historic mapping suggest that the				
church was built over former open field strips.	By: MH	Date: 24/6/15		
Site observation	Бу. ІVІП	Date. 24/0/15		
Earliest date (visible structures):				
Phasing- extensions and contractions: North and south doors offset.				
Heating ducts: None visible				
Internal graves/vaults: Memorial slabs on south wall of nave refer to 18 th cent burials				
Floor levels raised or lowered : Base of piers covered by timber pew platforms. More of pier plinths visible in north arcade than south.				
External drains: Drainage trench c50cm deep around outside				
Churchyard:				
Surroundings:				
Overall Assessment	By: MH	Date: 17/12/15		
Probably good survival of below-floor deposits inside church. Former ground surface predating				
church under mound around church.				
Research Questions				
Is there any evidence of a church on the site before the 13th century?
